

Manchester Microscopical & Natural History Society

Established 1880 (139th Year)

Monthly Meetings – Library – Booklets – Slides - Web

John Benjamin Dancer (1812-1887)
Manchester microscopist, inventor
and microphotographer

The Society was founded nearly 140 years ago to provide for the pursuits of those interested in microscopy and natural history. Today it provides regular meetings where talks are given by amateurs or professionals and members can provide exhibits, exchange gossip, just keep in touch, use the library or buy small goods. We also produce a yearly Newsletter (Micro Miscellanea), the occasional book or booklet on hints and tips or items of local historical interest, and an Internet site.

See where Science meets Art !!

Dancer microscope c1855

1st Anglesey MMS Drop In Sessions

Sat-Sun August 10-11th 11-4pm
